

Zelux®

(polycarbonate)

Zelux polycarbonate is an engineering plastic with excellent dimensional stability and good strength and stiffness over a wide range of service temperatures.

Zelux is often used for structural applications when clarity and impact strength are essential including lenses, manifolds, site glasses, and machine guards.

Zelux is used for a wide variety of electrical applications since it has low moisture absorption, good insulating properties, and an excellent flammability rating.

Zelux is easy to fabricate, paint, and glue.

The following physical property information is based on typical values of the base polycarbonate resin.
