

TECADUR MT TR natural - Stock Shapes (rods, plates, tubes)

Chemical Designation

na ()

Colour

transparent

Density

1.18 g/cm³

Main features

- → good chemical resistance
- → excellent impact strength
- → high gamma radiation resistance

Target Industries

Date: 2017/05/17

- → medical technology
- → pharmaceutical industry
- → chemical technology

Mechanical properties	condition	value		test method		comment
Modulus of elasticity (tensile test)	73 °F	219,500	psi	ASTM D 638

This information reflects the current state of our knowledge and is intended only to assist and advise. It is given without obligation or liability. It does not assure or guarantee chemical resistance, quality of products or their suitability in any legally binding way. Values are not minimum or maximum values, but guidelines that can be used for comparative purposes in material selection. They are within the normal range of product properties and do not represent guaranteed property values. Testing under individual application circumstances is always recommended. Data is obtained from extruded shapes material unless otherwise noted. References to FDA compliance refer to the resins from which the products were made unless otherwise noted.
